

CombiBloc

Close-coupled centrifugal pumps

> Johnson Pump®

CombiBloc is the premier solution for pumping clean thin liquids in a very cost-effective way.

The pump is part of SPX FLOW 's Johnson

Pump brand Combi-system, a modular programme of single stage centrifugal pumps with a high degree of interchangeablility of parts between the different pump constructions.

Based in Charlotte, North Carolina, SPX
FLOW (NYSE: FLOW) is a multi-industry
manufacturing company with operations
in more than 35 markets worldwide. SPX
FLOW's innovative, world-class products and
highly-engineered solutions are helping to
meet the needs of a constantly developing
world and growing global population. You'll
find our innovative solutions in everything from
dairy plants and power plants to oil and gas
pipelines, and the power grid. SPX FLOW is
really everywhere you look.

We help our customers around the globe expand and enhance their food and beverage, power and energy and industrial production processes. For more information, please visit www.spxflow.com

CombiBloc

CombiBloc represents a range of horizontal centrifugal pumps close-coupled to electric motors. The pump is suitable for handling low-viscositty, clean or slightly contaminated and aggressive liquids.

Characteristic of the CombiBloc is the compact configuration of the pump and the electric motor assembly. The use of a stub shaft allows standard IEC electric motors to be used.

Thanks to the small number of components and the use of a mechanical seal, the CombiBloc requires little maintenance. This is further supported by Back Pull Out of the rotating assembly.

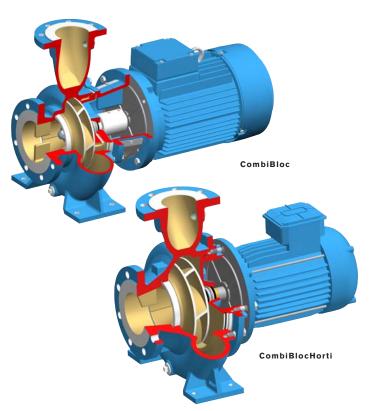

The CombiBloc has applications in crop farming and market gardening, on board ships and in handling various chemicals.

Test bed SPX Flow Technology in Assen, the Netherlands

TECHNICAL DATA							
MAX. CAPACITY	850 M³/H						
MAX. HEAD	105 M						
MAX. WORKING PRESSURE	10 BAR						
MAX. TEMPERATURE	120 °C						
MAX. SPEED	3600 RPM						

CombiBlocHorti is an End Suction close coupled pump with extended shaft as an modulair variant within the combi range for horticulture applications.

Typical product applications

From know-how to finding solutions

GENERAL INDUSTRY

The CombiBloc can be applied as a general duty pump in many industrial applications. Because of its economic features and ease of construction this pump is also ideally suited for space saving OEM skid mounting.

SHIPBUILDING

CombiBloc pumps can handle both clean and slightly contaminated fresh water and sea water. Their compact, space saving build makes them ideal pumps for engine rooms and general duty.

UTILITY

Applications of the CombiBloc within utility buildings are as general duty pumps, circulation pumps in heating and airconditioning systems and pumps in water purification plants.

HORTICULTURE

In horticulture the CombiBloc is used as a transport pump for hot water heating systems.

Features and benefits

PUMP CASING

- flanges according to ISO 7005
- max. working pressure 10 bar
- · drain opening
- wide range of applications
- complete and fast draining of the casing

PUMP COVER

- flat gasket, fully chambered
- machined fits
- no gasket blow-out
- perfectly aligned

SUCTION CAPABILITIES

- smooth suction entry in pump casing
- smooth surface
- anti rotation vane
- optimum suction capabilities
- minimal flow distortion giving better suction capabilities

IMPELLER LOCKING

- impeller nut with spring washer
- reliable locking

HYDRAULIC BALANCING

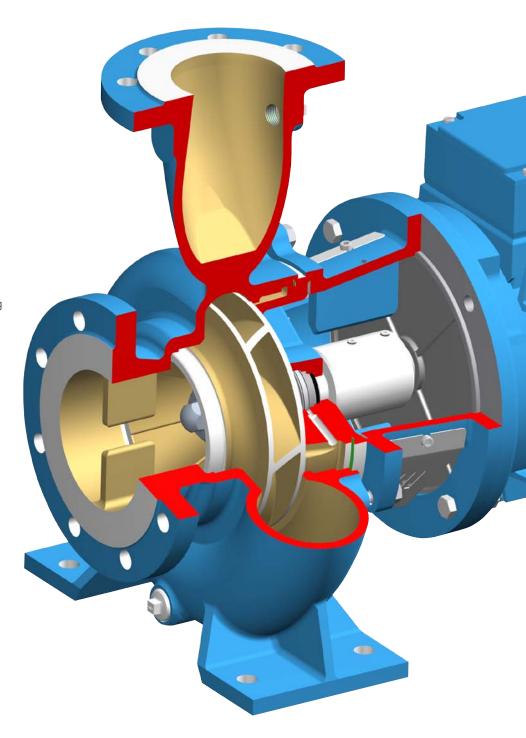

- flat cover for hydraulic balancing
- back vanes for hydraulic balancing
- extended bearing life time

FOOT

- machined foot
- exact positioning on base and in pipework

MATERIALS

- pump casing: cast iron bronze stainless steel
- impeller: cast iron bronze stainless steel
- stub shaft: stainless steel

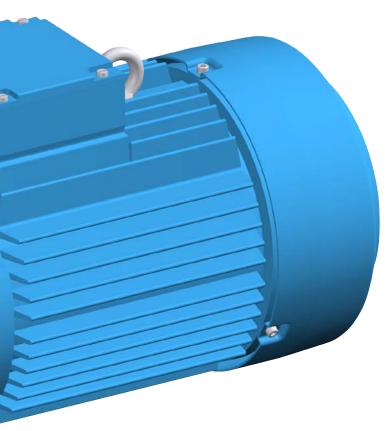

COUPLING GUARD

- consisting of 2 identical parts with snap fit
- aluminium
- quick and easy mounting
- for increased safety
- non sparking

ELECTRIC MOTOR

- standard IEC size flange motor
- fixed bearings
- larger pump sizes mounted with foot-flange motor
- independance of motor make
- economic
- reliable
- readily available

EASY AND LOW COST MAINTENANCE

- pump cover and lantern piece mounted to pump casing as one unit, no separate bolting
- quick and easy impeller replacement
- only 3 mechanical seal sizes
- changeable wear ring (only bearing bracket 2 and 3)
- easy to disassemble pump cover
- economic maintenance
- extended pump life time

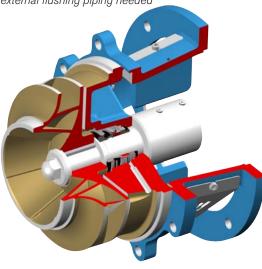

LANTERN PIECE

- rigid cast iron construction
- machined fits
- · large openings
- exact alignment
- easy access for inspection and service

SEAL CHAMBER

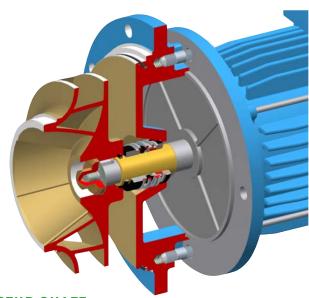

- seal chamber integrated in pump cover
- large and tapered shape
- internal seal flushing bore to seal chamber
- perfect alignment resulting in increased seal life
- better drainage of seal chamber
- ample seal flushing

no external flushing piping needed

SHAFT SEALING

- mechanical bellows seal according to EN 12756 (DIN 24960 L_{1k})
- several material combinations
- no O-ring lock up
- interchangeable with other EN (DIN) seal makes
- suitable for many liquids

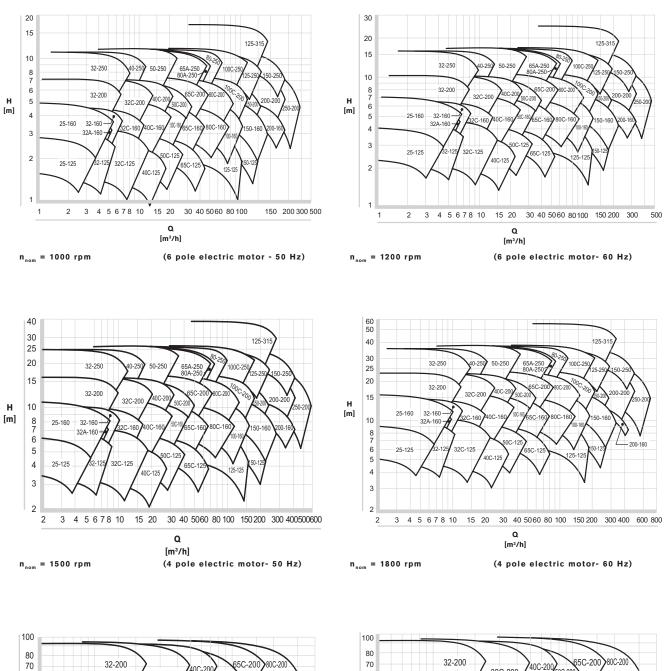

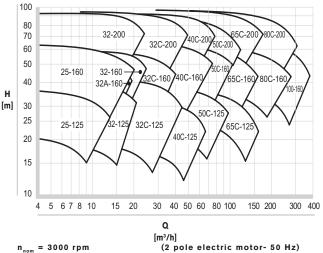

STUB SHAFT

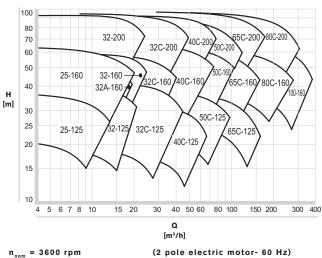

- stainless steel AISI 316
- fits to IEC electric motors
- axial fixation with set screws
- 3 shaft diameters
- no shaft sleeve needed
- easy impeller replacement
- adjustable axial impeller position
- low maintenance cost

Hydraulic performance data

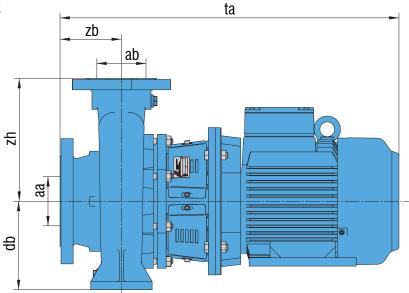

These curves are based upon *nominal* electric motor speeds. The actual pump performance curves may vary from these curves, depending on the actual electric motor speed.

Dimensions

ta: based on DIN 42677, actual size depending on motor make ISO 7005 PN 16 \cong EN 1092-2 (EN 1092-1 stainless steel)

* = ISO 7005 PN 6 \(\simes \) EN 1092-2 (EN 1092-1 stainless steel)

** = ISO 7005 PN 10 \(\text{EN } 1092-2

*** = stainless steel

- = not available in stainless steel
